3 – Mar. - 2015

Regarding: Cyclorganic Fertilizer

To Whom It May Concern:

We have been purchasing Cyclorganic from Ivan Milin since January 2013.

Each year we introduce more customers to Cyclorganic and customers are always happy to give us feedback on the product. Results are noticed in all plant categories, whether grown indoors or outdoors. Experienced growers tell us of larger, healthier, plants and higher yields.

Customers are pleased that Cyclorganic is all natural and not harmful to the environment. We hand out small samples to customers along with literature on Cyclorganic and they always return to purchase larger sizes. When used as a plant tea there is vigorous new growth even on mature plants. When mixed into the medium it fertilizes the plant for up to 3 months.

We, at Hydrotech, thanks to our customer's feedback are very confident in recommending Cyclorganic.

We also find Ivan Milin a delight to work with. He is always most enthusiastic and believes 150% in his product and is able to promote the scientific aspects of Cyclorganic in layman's terms.
